Work Experience

Nexzware Technology – Java Developer Intern Sep 2026 – Oct 2026

- Gained hands-on experience in mobile application development using **Dart**, **Flutter**, and **React Native**, focusing on responsive UI development and application functionality.
- Developed practical knowledge of **Java** and **Spring Boot** for backend development, RESTful API integration, and communication between frontend applications and backend services.
- Worked with **PostgreSQL** for relational database management, SQL queries, and backend data integration.
- Explored **Razorpay** payment gateway integration to understand digital payment workflows in mobile and web applications.
- Participated in project development activities involving **ParkShare**, a **Fitness Mobile Application**, and **Website Development**, gaining exposure to full-stack development, debugging, and application testing.

Projects

Fitness Trainer Mobile App **Tech Stack: React Native, Java, Spring Boot, PostgreSQL, JWT, Razorpay**

- Developed a fitness application supporting client and trainer workflows, including trainer profiles, appointment bookings, fitness goals, and progress tracking.
- Integrated **Spring Boot REST APIs**, **PostgreSQL**, and **JWT authentication** for backend services and user access management, while exploring **Razorpay** payment integration.

ParkShare – Parking Management Application **Tech Stack: Flutter (Dart), Java, Spring Boot, PostgreSQL, REST APIs**

- Developed a parking management application to streamline parking space discovery, availability tracking, and booking workflows through a mobile-friendly interface.
- Implemented backend services using **Spring Boot** and **PostgreSQL** to support API communication, structured data management, and parking-related operations.

Invoicing ROI Simulator **Tech Stack: React (Vite), Node.js, Express.js, MongoDB, Recharts, jsPDF**

- Built a **full-stack ROI simulator** for invoicing automation with **real-time calculations, scenario analysis, and interactive charts**.
- Designed a **responsive, animated UI/UX** with **PDF report generation** and a **MongoDB/Node.js backend** for data persistence.

Code Runner Web Application **Tech Stack: React, Vite, Tailwind CSS, react-ace, Go, Gin, Docker**

- Built a **multi-language code editor** with real-time syntax highlighting using **react-ace** and a **Go/Gin backend** for code execution.
- Developed a **Dockerized, responsive frontend** using React, Vite, and Tailwind CSS, with file import/export and LocalStorage autosave.
